

# Biomedical Engineering

## Seminar

### Biomedical Engineering and Medical School

By

**Dr. Jay McIsaac**

**Tuesday, September 21, 2004**

**United Technologies Building, Room 150**

**4:00-5:00 pm**

#### **Abstract:**

The Medical School application process will be described, including what the Medical School Committee members are looking for in an applicant, both on paper, and in the interview.

Also, what a biomedical engineer has to offer as a physician; with some examples from Dr. McIsaac's own practice.

Tentatively scheduled: Chris Binette, a UConn BME Alum of 2004 and a current Med School student at the UCHC, will talk about his application experiences and describe the new UConn BME website highlighting the Medical School application process.

---

Dr. Jay McIsaac is an Adjunct Professor in the UConn BME program and is the Premed Advisor for BME students. He has a MS Degree in BME as well as a MD. He is a Partner and Chief of Urologic Anesthesia at Hartford Anesthesiology Associates, Inc., and Founder, CEO, and Director of Research and Development, at Mountain Laurel Biomedical, LLC.
