

# 2014-2015 CLINICAL ENGINEERING INTERNSHIPS UNIVERSITY OF CONNECTICUT

The Biomedical Engineering Program is pleased to announce the availability of Clinical Engineering Internship opportunities at the University of Connecticut beginning the Fall 2014 semester. Students accepted into this program earn a M.S. in Biomedical Engineering, which requires a minimum of 15 credit hours of course work and a Thesis or 24 credit hours of course work without a Thesis.

Institutions currently participating in the program include: Hartford Hospital, John Dempsey Hospital, West Haven VA Hospital, Boston VA Hospital, Providence VA Hospital, Baystate Medical Center, Middlesex Memorial Hospital, Massachusetts General Hospital, UMass Medical Center, Brigham & Women's Hospital, Rhode Island Hospital and ABM Health Incorporated. Activity at these major medical institutions involves an in-depth exposure to all clinical engineering activities.

The two-year Clinical Engineering Internship program offers an in-depth, rigorous, clinical experience that matches the engineering expertise gained in the classroom. The primary objectives of this intense internship program are as follows:

- ❑ Provide exposure to hospital organization and administrative functions.
- ❑ Permit hospital experience of clinical engineering; that is, provide an opportunity to apply engineering techniques to patient care and hospital-based research.
- ❑ Provide substantial experience working with hospital personnel, including administrators, nurses, technicians and medical staff.

The internship includes a stipend for each academic year and a full tuition scholarship. Summer support is also available. Information about this program is contained in the Biomedical Engineering Handbook at

<http://www.bme.uconn.edu/program-handbook.php>.

A graduate application is available for download at

<http://grad.uconn.edu/prospective/apply.html>.

**For details contact:**
